

THE NEW RINGFEDER GENERATION

IMPROVING PERFORMANCE – ADDING VALUE

The new generation high-quality Ringfeder trailer couplings are designed for improved operation and reduced maintenance costs, providing unsurpassed reliability and extended product life.

REDESIGNED TO PERFORM

NEW ERGONOMICS

The redesigned hand lever makes manual models easier to operate.

NEW SAFETY DEVICE

The new design makes it even more robust and protected and it is easier to maintain and replace.

NEW REINFORCED RETURN SPRING FOR EASIER OPENING

JACKKNIFING WARNING

The warning system prevents costly damages to the drawbar and coupling equipment.
(Retrofit kit for 50mm couplings)

NEW COMPACT DESIGN

The compact size makes fitting easier for bodybuilders.

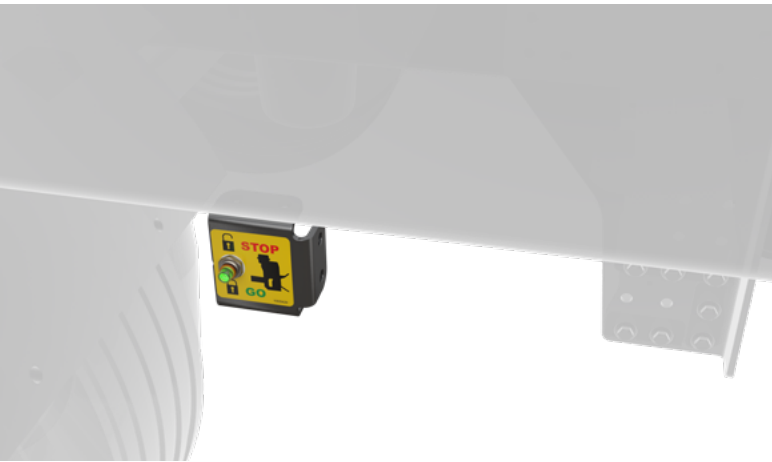

NEW FLUSH-MOUNTED SCREWS UNDERNEATH TO AVOID DAMAGES

NEW GUIDING FUNNEL

The lip is reinforced and the new funnel design makes it quick and easy to replace.

FEATURES FOR SAFETY AND CONVENIENCE

Locking indicator

OUTSIDE – CLEARLY VISIBLE

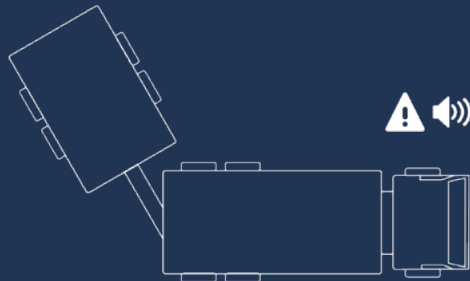

Locking mode is shown by a built-in LED light indicator, and the signal (red/green) is clearly visible also in the dark. By connecting a passive fibre optic cable to the indicator, the signal be displayed on any location, e.g. on the side of the vehicle.

IN CAB INDICATION

By the RINGFEDER indicator panel, locking mode (red/green) is conveniently displayed in the cab. Alternatively, the locking indication can be shown in the vehicle’s own display, if supported by the vehicle manufacturer.

JACKKNIFING WARNING

All 50mm couplings can be equipped with a jackknifing warning system. With this warning system, the driver is alerted and can avoid jackknifing before it is too late. This safety feature saves time and hassle when reversing, and you avoid equipment damage and costly repairs.
